

# Grade 7 Overview

## Ratios and Proportional Relationships

- Analyze proportional relationships and use them to solve real-world and mathematical problems.

## The Number System

- Apply and extend previous understandings of operations with fractions to add, subtract, multiply, and divide rational numbers.

## Expressions and Equations

- Use properties of operations to generate equivalent expressions.
- Solve real-life and mathematical problems using numerical and algebraic expressions and equations.

## Geometry

- Draw, construct and describe geometrical figures and describe the relationships between them.
- Solve real-life and mathematical problems involving angle measure, area, surface area, and volume.

## Statistics and Probability

- Use random sampling to draw inferences about a population.
- Draw informal comparative inferences about two populations.
- Investigate chance processes and develop, use, and evaluate probability models.

## Mathematical Practices

- Make sense of problems and persevere in solving them.
- Reason abstractly and quantitatively.
- Construct viable arguments and critique the reasoning of others.
- Model with mathematics.
- Use appropriate tools strategically.
- Attend to precision.
- Learn and apply procedures flexibly.
- Look for and make use of structure.

**Ratios and Proportional Relationships****7.RP**

Analyze proportional relationships and use them to solve real-world and mathematical problems.

1. C  e a e a c a ed a f f ac , c d g a  
f e g , a ea a d e a e ea ed e

- b. U de a d a ege ca bed ded,  $\frac{p}{q}$  ded a ed  
 $e, a \text{dee } e f \text{ege } ( - e d )$   
 $a a a \text{be. If } p \text{a d } q \text{a e ege, } e (p/q) = (p)/q =$   
 $p/(q). I e \text{a } e f a a \text{be b de c b g ea-}$   
 $d c e .$
- c. A  $\frac{p}{q}$   $\frac{p}{q}$   $\frac{p}{q}$  e f  $\frac{p}{q} a$  a a ege  $\frac{p}{q} a d$   
 $d de a a \text{be.}$
- d. C e a a a be a dec a g g d ;  
 $a e dec a f f a a a be e a e o$   
 $e e a e a .$
3. S e ea- d a d a e a ca  $\frac{p}{q}$  be g e f  
 $\frac{p}{q} a a a \text{be !}$

**Expressions and Equations****7.EE**

**Use properties of operations to generate equivalent expressions.**

1. A  $\frac{p}{q}$   $\frac{p}{q}$   $\frac{p}{q}$  e f  $\frac{p}{q} a$  a a ege add,  $b ac, fac$ ,  
 $a de \frac{p}{q} d ea e \frac{p}{q} a a c ef ce .$
2. U de a d a e g a e  $\frac{p}{q}$  d f f e f a  
 $\frac{p}{q} be c e ca ed g e \frac{p}{q} be a d e a e$   
 $a e e a ed. For example, a + 0.05a = 1.05a means that "increase by$   
 $5%" is the same as "multiply by 1.05."$

**Solve real-life and mathematical problems using numerical and algebraic expressions and equations.**

LESSON 6: Solve real-life and mathematical problems using numerical and algebraic expressions and equations.
